PROFILE

I am a motivated and curious software engineer student with a strong foundation in programming, object-oriented design, and basic software development principles. I have experience with languages such as Python and Java, JavaScript and have worked on small projects involving web development and data structures. I'm eager to apply my skills in a real-world environment, contribute to meaningful projects, and learn from experienced software engineers as I begin my professional journey.

PROJECTS

■ E-Commerce Gift Box Web Application (Mini Project)

Developed a mini e-commerce web application focused on customized gift box purchases. The system enabled users to browse themed gift boxes, view product details, customize items, and place orders. Implemented an intuitive user interface and a functional product management workflow to simulate real-world e-commerce operations.

Key Features:

- User-friendly product catalog with images, descriptions, and pricing.
- Customizable gift box selection (users could choose items/add personal message)
- Shopping cart and checkout functionality
- Connect stripe payment gateway to handle user's payments
- Admin panel to add/update/delete gift items and manage orders
- Responsive design for both desktop and mobile device

Technologies Used:

- Front-End: HTML, CSS, JavaScript / Bootstrap
- Back-End: PHP / Laravel
- Database: MySQL
- Tools: Git, VS Code, XAMPP

■ Sri Lanka Railway Website – UI Redesign Project

Redesigned the user interface of the Sri Lanka Railway website using HTML and CSS to improve visual appeal and usability. Focused on creating a clean, modern layout with clear navigation, mobile responsiveness, and enhanced user experience

■ GPA Calculator Mobile App (Flutter)

Developed a mobile application using Flutter to calculate GPA based on course credits and grades. Designed an intuitive interface for adding courses, selecting grade values, and displaying the computed GPA result. Improved skills in Dart programming, widget layout, state management, and mobile UI/UX design.

■ Book Store Mobile App (Flutter)

Developed a book browsing and shopping application with category filtering, book detail pages, and cart functionality. Emphasized UI design, smooth navigation, and state management

EDUCATION

2022 - 2026

SRI LANKA TECHNOLOGICAL CAMPUS

- Bachelor of science Honours
In Software Engineering

2024

UNIVERSITY OF MORATUWA

- Department of Computer Science &
Engineering, Faculty Of Engineering
(Python For Beginners)

SKILLS

- HTML, CSS, JavaScript
- Bootstrap, Tailwind CSS
- Java, Python , Php
- Reactjs, Nodejs , Laravel
- MySQL, MongoDB
- AWS, Docker , CI/CD
- Git, GitHub , GitHub Actions
- VS Code, Postman

LANGUAGES

- English
- Sinhala
